

Operations Officer, NPIC

27 November 1961

Deputy Director, NPIC

Review of SAC MCI's

1. It is requested that a joint project be established to review a typical SAC Photo Reconnaissance Index (PRI) of a KH mission.

2. The purpose of the project is to determine what contribution is made to the Intelligence Community that is not accomplished by the NPIC MCI.

3. It is requested that the review compare the PRI and MRI in the following areas as a minimum:

a. Format - What data are routinely presented in the PRI that are not presented in the MCI, and vice versa.

b. Targets - What is the difference in target lists between the two publications?

c. PI Content - For similar targets are there any differences in the PI content of the two publications? How extensive are these differences, if any?
